[1894]

Ko sta dve družini migrirali iz Italije v daljno Brazilijo, sta s seboj pripeljali štiriletnega fantka, ki je pozneje postal dedek bodočih ustanoviteljev podjetja Indus-Parquet. Ko je odrastel, je najprej delal na kavnih plantažah v okolici São Paula, vse dokler leta 1926 ni postavil temeljev svojega podjetja.

Two families migrated from Italy to Brazil, bringing along a little 4-year old boy, who became the grandfather of the future founders of IndusParquet. When he grew up, this man worked in the coffee fields in the interior of São Paulo State until he founded his joinery in 1926.

[1970]

Podjetje IndusParquet je nastalo v mestecu Tite v provinci São Paulo. Po 36 letih delovanja in že četrti družinski generaciji ga zastopajo tudi nekateri reprezentančni uslužbenci, ki mu zvesto sledijo že od same ustanovitve. Danes podjetje izstopa po svojih bogatih izkušnjah in visokem nivoju znanja o poznavanju vrst lesa in njihovi uporabi.

IndusParquet is established in the city of Tietê, in the State of São Paulo. With 36 years

of tradition in the production of flooring, and already in the fourth family generation to work with wood, IndusParquet is proud to maintain in its staff some employees that are in the company since its beginning. This vast experience guarantees high-level knowledge about the wood handled, a fact that makes IndusParquet different from its competitors throughout the world.

[1978]

Podjetje IndusParquet se je povezalo v partnerstvo z Escola Superior de Agricultura Luiz de Queiroz Univerze v São Paulu (USP). Namen združitve je bil ustvariti ustrezen način obravnave posamezne vrste lesa v skladu z njegovimi individualnimi značilnostmi.

V istem letu je bila postavljena tudi prva sušilnica.

Podjetje velja za pionirja na področju računalniškega vodenja sušenja lesa v Braziliji. S posebnim načinom obdelave je zagotovljeno uničenje lesnih zajedalcev in vzdrževanje količine vlage lesa, kakršna je značilna za določeno geografsko področje, kjer bo talna obloga položena.

IndusParquet goes into a partnership with Escola Superior de Agricultura Luiz de Queiroz, of the University of São Paulo (USP).

The main goal is to create a method to handle each species of wood specifically. Also in this year the first stove is acquired. The company is pioneer in the use of computer controlled stoves in Brazil, which enables the elimination of fungi, besides keeping the floor with the proper humidity for the world region in which it will be installed.

[1982]

[2001]

[2006]

Prva pošiljka izdelkov, ki so jih namenili tujemu tržišču, je potovala v Italijo. Danes podjetje izvaža svoje izdelke na vseh pet celin. Glavni kupci so ZDA, države EU in države Latinske Amerike.

The first export trade is made to Italy. IndusParquet sends its products to all five continents and has its main customers located in the USA, Europe and Latin America.

Izdelki podjetja IndusParquet se ponašajo s certifikatom Forest Stewardship Council (FSC), kar pomeni, da so narejeni iz lesa, ki prihaja iz gozdnih področij, ki so primerno vzdrževana in v procesu obnavljanja. Poleg omenjenih ukrepov za zaščito deževnega gozda izvaja Indus Parquet tudi program pogozdovanja v skladu z določbami, ki izhajajo iz partnerstva z ESALQ/USP.

Podjetje pa podpirajo tudi okoljevarstveniki, kajti uporabi vse surovine v celoti, hkrati pa ne obdelujejo lesa, ki ni označen s certifikatom IBAMA (vladna služba za nadzor izsekavanja gozdov); to pa dodatno spodbuja dobavitelje surovega lesa, da spoštujejo regulacije za izkoriščanje in obnavljanje deževnega gozda.

IndusParquet obtains certification from the Forest Stewardship Council (FSC), a seal that identifies products made of wood from sustainable managed forests. Further to environment protection projects, IndusParquet maintains a reforestation program in accordance with the partnership established with ESALQ/USP. In addition to that initiative, the company adopts a zero waste policy: 100% use of all wood that enters the factory. Besides that, raw materials that do not have sustainable managed forest certification issued by IBAMA (government entity that controls wood extraction) are not accepted, which motivates all suppliers to follow the environment preservation rules.

Podjetje IndusParquet je v stotoletni lasti brazilskega podjetja in je največji nacionalni proizvajalec tropskih oblog iz plemenitega tropskega lesa. Svoje izdelke izvažajo v več kot 23 držav po vsem svetu. V Braziliji velja za sinonom inovativnosti in oblikovanja. Uspeh podjetja temelji na tradiciji, lojalnosti in najboljših tehnoloških postopkih.

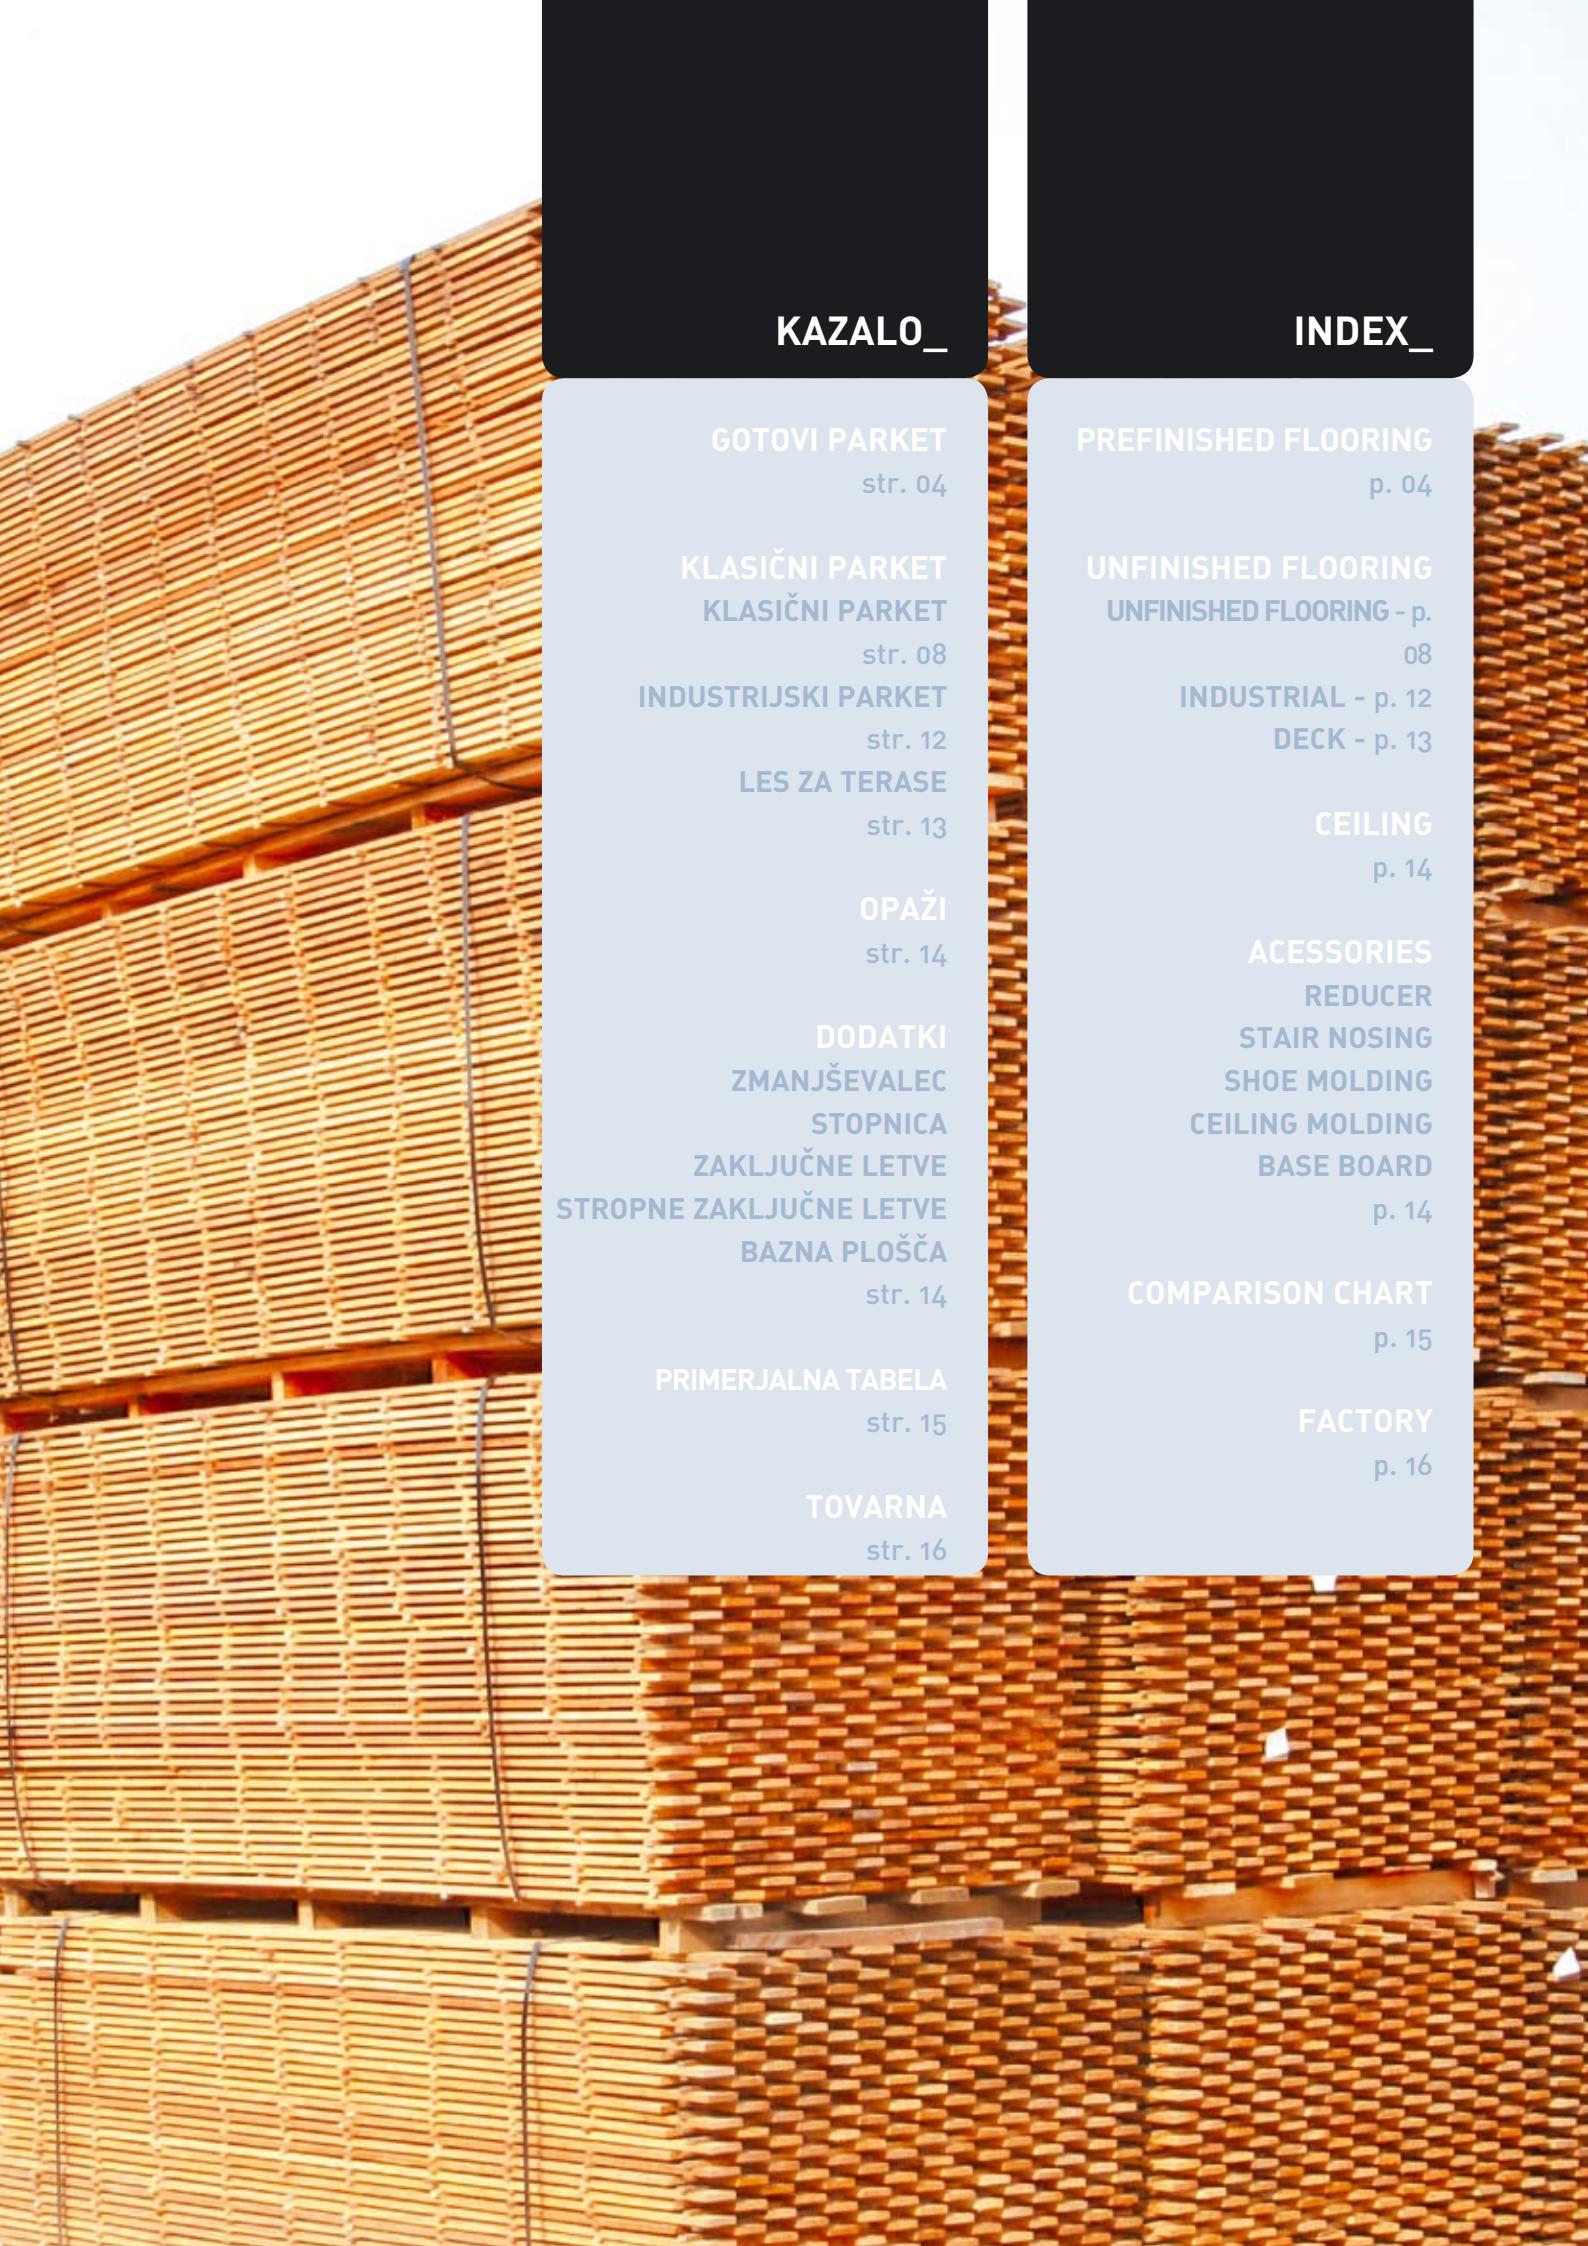

IndusParquet, a 100% Brazilian company and nation-wide leader in solid tropical wood flooring, exports to all five continents (23 countries) and becomes a synonym of design and innovation. Its success results from the sum of tradition, experience and use of the best machinery and production systems.

GOTOVI PARKET | PREFINISHED FLOORING

Izgotovljene talne obloge je na Brazilskem tržišču prvo ponudilo prav podjetje IndusParquet. Med postopkom na les nanesejo 6 slojev laka, oplemenitenega z aluminijevim oksidom in ga nato sušijo z UV sušilnikom, kar daje površini dodatno odpornost proti abraziji.

Prednosti izgotovljenih talnih oblog so hitra in enostavna montaža, poleg tega pa jih ni potrebno dodatno brusiti in lakirati.

Prefinished flooring were first introduced in Brazil by IndusParquet. In the company's factories, the wood receives six layers of varnish with aluminum oxide and is submitted to U.V. drying, which increases its resistance to attrition. The advantage of this floor is its easy installation, eliminating the need of polishing or varnishing.

KLASIČNI PARKET | UNFINISHED FLOORING

Neizgotovljene talne obloge izdelujejo iz petih različnih vrst masivnega plemenitega lesa. Vsak izdelek ima svojske značilnosti, kot naprimer, debelino, način polaganja in namen.

IndusParquet produces five different sorts of solid wood floors. Each one of them has its own characteristics of thickness, installation and use.

DODATKI | ACCESSORIES_

Poleg glavnih leseni delov so sestavni del talnih oblog tudi razni dodatki oz. zaključki, ki doprinesejo svoj delež k popolnemu izgledu in trajnosti izdelka. V podjetju IndusParquet izdelujejo tudi vse potrebne dodatke iz vseh naštetih vrst lesa.

Besides the main wood pieces, the floor needs some additional supplements, which are essential for a noble and durable result. For this reason, IndusParquet also produces accessories, such as reducers, stair nosings, shoe moldings, ceiling moldings and base boards.

V podjetju IndusParquet proizvajajo na temeljih sodobne tehnologije in bogatih izkušenj ter izbire najboljših dobaviteljev tropskega plemenitega lesa. Proizvodni proces na vseh stopnjah odraža skrb za okolje in kupce.

IndusParquet's production results from the sum of technology and experience, and is based on the principle of selecting the best suppliers. Diffused throughout the productive process is a great respect for the environment and the customers.

Tovarna ima velike zaloge surovin, tako pa lahko zagotovi dolgotrajno naravno in nato umetno sušenje, ki je nujni pogoj za visoko stabilnost končnega izdelka.

The company keeps large raw material stocks, which enable long and essential periods of natural drying, providing a higher stability to the final product.
